Three D Integrated Solutions Limited Conquers Business Processes Challenges with SAP Business One and Cinntra Infotech

Three D Integrated Solutions Ltd.
An ISO 9001, AS9100 and TRACE Certified Organization

Before: Challenges & Opportunities

- The inflexible traditional system was unable to provide sufficient information and hold the business back with only basic functionality.
- Three D requires strict quality control processes with rapid delivery.
- Lack of functionality within the existing system had made it cumbersome for Three D to run their daily operations effectively.
- Requirement of an integrated digital platform to accurately and efficiently manage sales, inventory, procurement, and financial accounting.
- Relied upon spreadsheets, which were slow and sometimes led to inaccuracies.

Why SAP and Cinntra Infotech

- SAP Business One is a robust enterprise resource planning solution specially designed for small and medium scale industries, which simplifies complex business operations. It helps to improve the results of different processes such as Purchase, Inventory, Accounts, and Sales with real-time connectivity.
- Cinntra solves the needs of companies by facilitating state-of-the-art SAP B1 solutions with a 100 % success rate in ERP implementation. Our results-driven approach can be adjusted and scaled according to unique business requirements. Thus, the company can easily move its business forward.
- After understanding the business challenges of Three D, Cinntra proposed an advanced automated solution that enabled the company to simplify and streamline its day-to-day processes, while integrating with cinntra's developed add-ons that meet their unique short-term and long-term needs.

After: Productivity Enhancements With Simplified Day-to-Day Operations

- The customized SAP B1 solution running on the S/4 Hana database successfully went live. Their post-implementation report reflected an impressive increase in productivity, with the system repaying itself within the least time. Now they have access to real-time information through a single system containing financial, customer relationship management, sales & purchase, and management control capabilities.
